

PRODUCT INFORMATION

Designed for steep, sloping hillsides and other structural challenges, the Vertica[®] retaining wall system can be built to virtually any height in incredibly tight spaces – thanks to an impressive 4-degree batter, built-in lug locators, and a nearly vertical rise for less excavation and land loss. Typically used with geosynthetic reinforcement, Vertica blocks meet or exceed industry standards for strength and durability.

- Pinless, patented locator lug gives quick, uniform setback for reduced labor costs
- Used in commercial-site development or anywhere space is at a premium
- Features warm earth-tone colors and rugged, rock-like texture
- Can be used to build gravity walls up to 3 feet 4 inches high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex™ retaining wall system when designed by a qualified engineer
- Minimum outside radius, measured on the top course to the front of the units: 5 feet
- Minimum inside radius, measured on the base course to the front of the units: 7 feet

**This height assumes insets are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.*

PRODUCT INFORMATION

Stretcher Units	Straight Face	Beveled Face
Approximate Dimensions*	8" x 18" x 11"	8" x 18" x 11"
Approximate Weight*	81 lbs.	78 lbs.
Coverage	1.00 sq. ft.	1.00 sq. ft.
Setback/System Batter	9/16"/4°	9/16"/4°

Accessory Units	Cap	Corner
Approximate Dimensions*	Front, 4" x 17 1/4" x 10 3/8" Back, 4" x 12" x 10 3/8"	8" x 18" x 9" 8" x 18" x 9"
Approximate Weight*	41 lbs.	101 lbs.
Coverage	1.22 lin. ft.	1.50 sq. ft.
