QUALITY FOR LIFE

The Imperial line offers a truly exceptional value. Imperial Pavers and Walls are manufactured with the same EP Henry quality standards and lifetime warranty you’ll find in all of our products, and are available in a range of the most popular colors and profiles in our industry. We believe that the choice between Imperial and the competition is clear when you see the difference up close.

**NOTES/FORMULAS**
- Pin calculator: (# on non-cap course) - (one) x (linear feet of wall)
- Minimum Inside radius = 42” (from back of block)
- Maximum height without engineering: 33” including cap. Above 33” EP Henry recommends you consult a professional engineer
- The Base Block facilitates installation and provides structural stability
- Always use Coventry Wall pins

INDUSTRY EXCLUSIVE LIFETIME PRODUCT WARRANTY
AND LIMITED INSTALLATION WARRANTY

Because we believe that the best warranty is one that you never use, we build quality into every product. We are so confident in our products that we offer a Lifetime Warranty on the structural integrity* of our paving stones and wall systems for residential use. At no cost to you, EP Henry will replace paving stones and wall system products whose structural integrity is found to be defective under normal use when properly installed according to EP Henry standards and guidelines (labor excluded). We also offer an industry exclusive Limited Installation Warranty on projects installed by an EP Henry Authorized Hardscaping Contractor®.**

*A defect in “structural integrity” means the inability of a properly installed and maintained paver or wall product to perform the function for which it was designed due to defects in material. A defect in “structural integrity” does not mean a function caused by improper installation, workmanship or efflorescence.

**Please visit ephemy.com for complete warranty details.
Cast Stone Wall and Cast Veneer Stone products are covered under a separate warranty; please visit our website for details.

PRODUCT NOTES
READ PRIOR TO INSTALLING ANY PAVER OR WALL PRODUCT

If you believe there is an issue with product style, color, or quality, do not install it and please contact your distributor immediately. Save all cube tags and provide to the distributor or manufacturer’s representative who comes to the job site. INSTALLATION OF PRODUCT IS DEEMED ACCEPTANCE. No claims or returns on installed product will be allowed.

EFFLORESCENCE

Efflorescence is a whitish, powder-like deposit common on concrete and masonry products which will normally disappear over time with natural weathering. According to the Interlocking Concrete Pavement Institute (ICPI), it will typically stop developing within 18-24 months. Although it may present an aesthetic concern, efflorescence will not affect the structural performance of pavers or wall systems. Efflorescence is a natural occurrence for which EP Henry accepts neither responsibility nor liability. For more information, please visit: www.icpi.org, www.ncma.org, www.masonryinstitute.org, or www.bia.org.

DE-ICING

While no concrete product is truly de-icing salt proof, EP Henry Pavers — due to their high strength and low absorption rates — are more resistant to de-icing salts than poured concrete, asphalt and pavers that utilize inferior materials. However, misuse of de-icing products can, over time, lead to damage. EP Henry recommends the Interlocking Concrete Pavement Institute’s guidelines to limit exposure to de-icing materials. For more information visit icpi.org.

COLOR

EP Henry Hardscaping products are made from natural materials and variations in shade can be expected. Additionally, many of our colors are achieved through a random mixture of several colors and the presence of any of these colors will vary from one unit to another. It is recommended that the installer draw from multiple cubes of material during installation to disperse any color range more uniformly. The end user of the material (home or business owner) should make their selection from current physical product samples that show the range of color.

DON’T SCUFF THOSE PAVERS!

EP Henry recommends the use of a vibrating plate compactor with a protective pad to prevent surface damage to the pavers during installation. EP Henry will not be responsible for compaction scuffs or burns on pavers. PLEASE NOTE, some pavers and all Devonstone slabs should not be compacted using a vibrating plate compactor.
