ENGINEERED FOR THE EDGE
Build it right. Build with Sleeve-It.

SLEEVE-IT
by STRATA
Sleeve-It units are palletized in a stacked, nested format.

CODE COMPLIANT FENCE POST ANCHORING SYSTEM
Sleeve-It® SD-1 is a pre-engineered fence post anchoring solution for enhancing below-grade foundational stability in fences placed on top of a segmental retaining wall (SRW). Sleeve-It’s patent-pending design allows stable fence footings to be integrated into the support structure of the SRW while it is being constructed. Because of its cantilevered form and other properties, using Sleeve-It during the SRW build permits a code-compliant fence to be constructed, eliminating the 36” offset requirements of IBC 1015.2.
EASY TO INSTALL
Seamlessly integrates into the SRW construction process and eliminates the hassle of auguring once the wall is complete.

COMPATIBLE WITH MOST FENCES
Sleeve-It is designed to accommodate the most common SRW fence types.

CODE COMPLIANT
Sleeve-It is compliant with IBC 1015.2, IBC 1607.8.1 and ASCE 7 4.5.1.

MAXIMIZES LAND USE
Eliminates the offset requirement for rails and fences within 36" of the edge of the open side of an SRW.

STACKABLE AND PORTABLE
Lightweight, unitary design makes Sleeve-It easy to stack, store and transport to jobsites – reducing stocking space, shipping costs and labor requirements.

RECYCLED MATERIAL
Sleeve-It is made with ~95% post-consumer recycled polypropylene.
Use Sleeve-It to save space, time and costs on your next project.
