TECHNICAL INFORMATION SHEET

BASE COURSE BLOCK (COVENTRY WALL III, IMPERIAL WALL SINGLE & DOUBLE SIDED)

PRODUCT DESCRIPTION: The **Base Course Block** is a no slump kiln dried concrete unit with a 6 degree angle on one end and a flat 90 degree surface on the opposite end. It is designed for below grade construction because it is **not distressed**. As the base course it is compatible with Coventry Wall III, Imperial Wall Single & Double Sided.

SELLING FEATURES: Provides a single source cube of large unit block for base construction
Easier and faster installation of the base course; less units to place and level
Provides greater structural base stability
Eliminates the need to use smaller Double Sided Wall units in base course

INSTALLATION OVERVIEW: Installed using standard base course construction methods. Straight line construction is achieved by butting the 90 degree ends and 6 degree angled ends together. Curvilinear construction is achieved by combining the 90 degree and 6 degree ends or by cutting a desired angle on either end.

PRODUCT TECH SPECS: NA

SIZES: 18/16" L x 10" D x 6" H

COLORS: Autumn Blend, Dakota Blend, Harvest Blend, Pewter Blend – UNITS ARE NOT DISTRESSED

PRODUCT PACKAGING: 45 pieces / cube
33 SF / cube
64 LF / cube
86 lbs / unit
3,870 lbs / cube

PLANT PRODUCTION: Wrightstown/Parkerford
